Amending Order 1, No Transferability of Licenses

The amending order clarifies that licenses are strictly non-transferable. A licence issued to a partnership or corporation is automatically cancelled if there is any direct or indirect change in majority ownership or control compared to when the licence was first granted. Any other ownership changes require prior approval from the Commission. Additionally, agencies marketing greenhouse, processing, or storage crops must operate under a marketing plan approved by the Commission, and no modifications to that plan may occur without prior Commission approval.
